

PLATFORM SECURITY

- SSO and MFA for administrative access
- Encryption in transit and at rest
- Network isolation with segmentation between control and data planes
- Comprehensive audit logging with export options

PRIVACY AND RESIDENCY

- Tenant isolation
- Data processing aligned with documented privacy practices
- Configurable data export and deletion workflows

RELIABILITY

- Multi-region design for high availability
- Rolling updates with zero customer downtime targets

ASSURANCE

- Controls mapped to established security frameworks
- Independent testing and continuous control monitoring
